

Mr. Fluckey By: Hunter Knight

I spoke with Mr. Fluckey and asked him a few questions we thought people might want to know. He enjoys his job and decided to become a teacher after being a bank vice president and helping teens open bank accounts. He wanted to teach life skills, and he doesn't believe in learning something you won't use in your future. Mr. Fluckey has been teaching business for seventeen year. Before teaching he was an account manager at Coca-Cola, and also a Vice President of lending at a bank. He feels that all the technology can help and hurt education. He feels that students struggle with communication because of technology.

Mr. Fluckey believes the Pawnee School website is beneficial only if people are checking it. He also does not use Google Classroom.

Thank you for your time during this interview, Mr. Fluckey.

The World According to Shelby...

In the year of Covid restrictions, basketball will be a little different than we are all accustomed to. I have been playing for the Briggsdale Falcons for the past 3 years. We have 18 team members made up of freshmen through seniors. I believe that my team is going to do well this year as we have all of our starters back from last year. As for now, we are hoping to start basketball practice after Christmas break. Our first practice will be on January 4th followed by our first game on January 7th. As for right now, we have to wear masks the entire time during games. It is possible that we will have extended time at the end of the quarter in our huddles to allow us extra time to breathe. As for right now, there can only be 10 people in the gym at a time. This means there are no subs, no refs, and no coaches. That will most likely change by the time we actually get to play.

Sering Pino: By: Hunter Knight

I interviewed Sering about his experience in Middle School. He prefers to attend school in-person, because he thinks it is easier to pay attention. When we were in homeschool, Sering enjoyed Zoom meetings because it was a way to talk to his teachers "in person". During our last quarantine he had between two and three Zoom meetings each school day. He thinks that Google Classroom is ok, but prefers pencil and paper work to computer work.

Sering thinks the biggest difference between middle school and elementary is that you move from class to class. His favorite experience so far is playing instruments and having more interactive activities during music. Sering thinks that middle school PE is SUPER fun! He likes the shooting game that we have started playing in PE for basketball. He is also enjoying decorating the music room with Mr. Leclerc. His favorite school lunch is chili with cinnamon rolls, and his favorite sport to play is football. He was interested in playing sports, and it is a family tradition to play football at Pawnee. He is very excited because he is FINALLY old enough to play jr. high football.

Thank you for your time Sering and good luck in basketball!!!

Mr. Rose By: Bailey Loyd

I had the opportunity to ask Mr. Rose some questions. To summarize the results, he said that he enjoys his job and the reason he chose it is because he wanted to make an impact on our future country. He has had several jobs before including mechanic, experiment station, and oil pumper. He also thinks that Tech is good if used as a tool, but if used all the time then it not only damages our body physically but if used all the time it can also damage our mental health. To Mr. Rose the school website could be very beneficial but could we also have to learn how to use it right. Although Google Classroom is a useful tool to Mr. Rose, he believes that on-hand learning will always be the way to go.

A Big Thank You to Mr. Rose for allowing us to interview him!

Easton Basinger By: Bailey Loyd

Easton was kind enough to let us interview him. Easton is in the 2nd grade at Pawnee School. Easton likes the subjects math, P.E., computers, and music. During recess he likes to play tag. Easton said that his favorite teacher is Mrs. Knight because she is silly. He likes in-school more because then his siblings don't bother him. When he grows up he wants to become a firefighter and horseshoer. He likes the color red too. His favorite cafeteria food is pizza!

Thank you Easton for letting us interview you.

Senior Spotlight

Shelby

I'm a senior. I am looking forward to graduation. After high school, I plan on attending Concordia University in Seward, Nebraska, on a basketball scholarship. While attending Concordia, I plan on majoring in Health and Human Performance and

minoring in Coaching.

Mayson

I'm a senior. After graduation, I am going to boot camp to train to be a Marine. Once I'm done training they will put me through a different set of training to become a sniper. I'm not interested in going to college until after I am done with the Marines. Once I am done with the Marines I will go to college to become a veterinarian so I can take care of my own animals when I need to. Once I am done with school I will start to build on my grandpa's ranch so in the future we will be successful with our ranch.

Chase

I'm a senior. After I graduate from Pawnee High School, I'm going to try my best to become successful in the field of construction. I'm not interested in college at this time, so instead I'm going to try my hand in the construction industry starting as an apprentice. I would like to try and get on my own feet and move closer to the town in an apartment, moving up from there.
